Academic Projects

Title: E-Grampanchayat Management System

Tools: Visual Studio Code, Spring Tool Suite, MYSQL Workbench, Postman

Technology: Angular, Bootstrap, Spring-Boot, MYSQL

Roles: Full-Stack web application

An E-Grampanchayat Management System is a digital platform that helps in Managing the operations and services of a Gram panchayat, It includes various features like online payments, citizen services, record keeping and communication tools, This system aims to improve efficiency, transparency and accessibility in the functioning of gram panchayats, It allows people to access services such as resident certificate, birth certificate, date certificate etc. With the help of E-Grampanchayat Management System we can reduce physical visits and paperwork.

Overall, it helps in better governance and administration of rural areas.
